

# Quarterly Indicators

## Q3-2013 | MOUNTAIN REGION

Includes the Aspen Board of REALTORS®, Glenwood Springs Association of REALTORS®, Gunnison County Association of REALTORS® Inc, Steamboat Springs Association of REALTORS®, Telluride Association of REALTORS® and Vail Board of REALTORS®.

Percent changes calculated using year-over-year comparisons.

With a fourth consecutive quarter of increases in almost all market indicators, we can comfortably say that most areas of Colorado are returning to what industry analysts would describe as "normal market conditions."

New Listings were up 2.2 percent for single family homes and 3.8 percent for townhouse-condo properties. Pending sales clocked in at 590 for single family homes and 460 for townhouse-condo properties.

The Median Sales Price was up 10.6 percent to \$414,750 for single family homes and 23.5 percent to \$339,500 for townhouse-condo properties. Months Supply of Inventory stood at 12.6 for single family units and 11.4 months for townhouse-condo units.

Of course two rounds of natural disasters in our state – fires and flooding – over the summer months will have significant impact on housing in the areas most directly affected and perhaps some ripple effects elsewhere. This means that not everyone is enjoying normal market conditions.

## Monthly Snapshot

**+ 5.8%**      **+ 16.6%**      **+ 2.0%**

One-Year Change in **Sold Listings All Properties**      One-Year Change in **Median Sales Price All Properties**      One-Year Change in **New Listings All Properties**

Residential real estate activity in the state of Colorado, comprised of single-family properties, townhomes and condominiums. Percent changes are calculated using rounded figures.

# Glossary of Terms

A research tool provided by the Colorado Association of REALTORS®

Mountain Region

## New Listings

A measure of how much new supply is coming onto the market from sellers (e.g., Q3 New Listings are those listings with a system list date from July 1 through September 30).

## Pending/Under Contract

A count of all the listings that went into Pending / Under Contract during the reported period. Pending / Under Contract listings are counted at the end of the reported period. Each listing can only be counted one time. If a listing goes into Pending / Under Contract, out of Pending / Under Contract, then back into Pending / Under Contract all in one reported period, this listing would only be counted once. This is the most real-time measure possible for home buyer activity, as it measures signed contracts on sales rather than the actual closed sale. As such, it is called a “leading indicator” of buyer demand.

## Under Contract Activity

A count of all listings Under Contract during the reported period. Listings that go Under Contract are counted each day. There is no maximum number of times a listing can be counted as Under Contract. For example, if a listing goes into Under Contract, out of Under Contract, then back into Under Contract all in one reported period, this listing would be counted twice.

## Sold Listings

A measure of home sales that were closed to completion during the report period.

## Median Sales Price

A measure of home values in a market area where 50% of activity was higher and 50% was lower than this price point.

## Average Sales Price

A sum of all home sales prices divided by total number of sales.

## Percent of List Price Received

A mathematical calculation of the percent difference from last list price and sold price for those listings sold in the reported period.

## Days on Market

A measure of how long it takes homes to sell, on average.

## Housing Affordability Index

A measure of how affordable a region’s housing is to its consumers. A higher number means greater affordability. The index is based on interest rates, median sales price and average income by county.

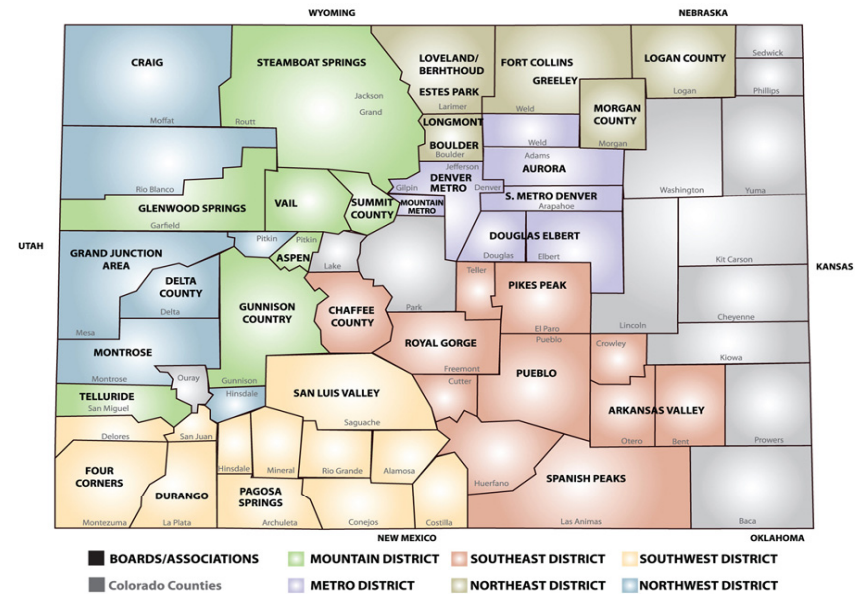

## Active Listings

A measure of the number of homes available for sale at a given time. The availability of homes for sale has a big effect on supply-demand dynamics and home prices.

## Months Supply of Listings

A measure of how balanced the market is between buyers and sellers. It is expressed as the number of months it would hypothetically take to sell through all the available homes for sale, given current levels of home sales. A balanced market ranges from 4 to 7 months of supply. A buyer’s market has a higher number, reflecting fewer buyers relative to homes for sale. A seller’s market has a lower number, reflecting more buyers relative to homes for sale.
