

Karlyn Armstrong is a Water Resource Engineer for the Colorado Division of Water Resources where she reviews a variety of applications and referral requests for compliance with Water Court decrees, Colorado Revised Statutes and the rules, regulations and policies of the State Engineer. Her work is currently focused in the Denver Basin area of the South Platte River Basin. When not reviewing applications and referrals she is helping customers with groundwater administration questions and dabbling in Colorado water policy projects. Karlyn holds an engineering degree from the Colorado School of Mines and an MPA from the University of Colorado, Denver.

Jeff Deatherage is the Chief of the Water Supply section in Denver and manages the water supply teams that review and evaluate substitute water supply plans, water court applications, well permit applications, subdivision water supply plan referrals, and other related water supply branch activities covering the seven water divisions in the state. Jeff is a registered professional engineer with a degree in civil engineering and is an alumni of both Colorado State University and the University of Colorado, Denver.
